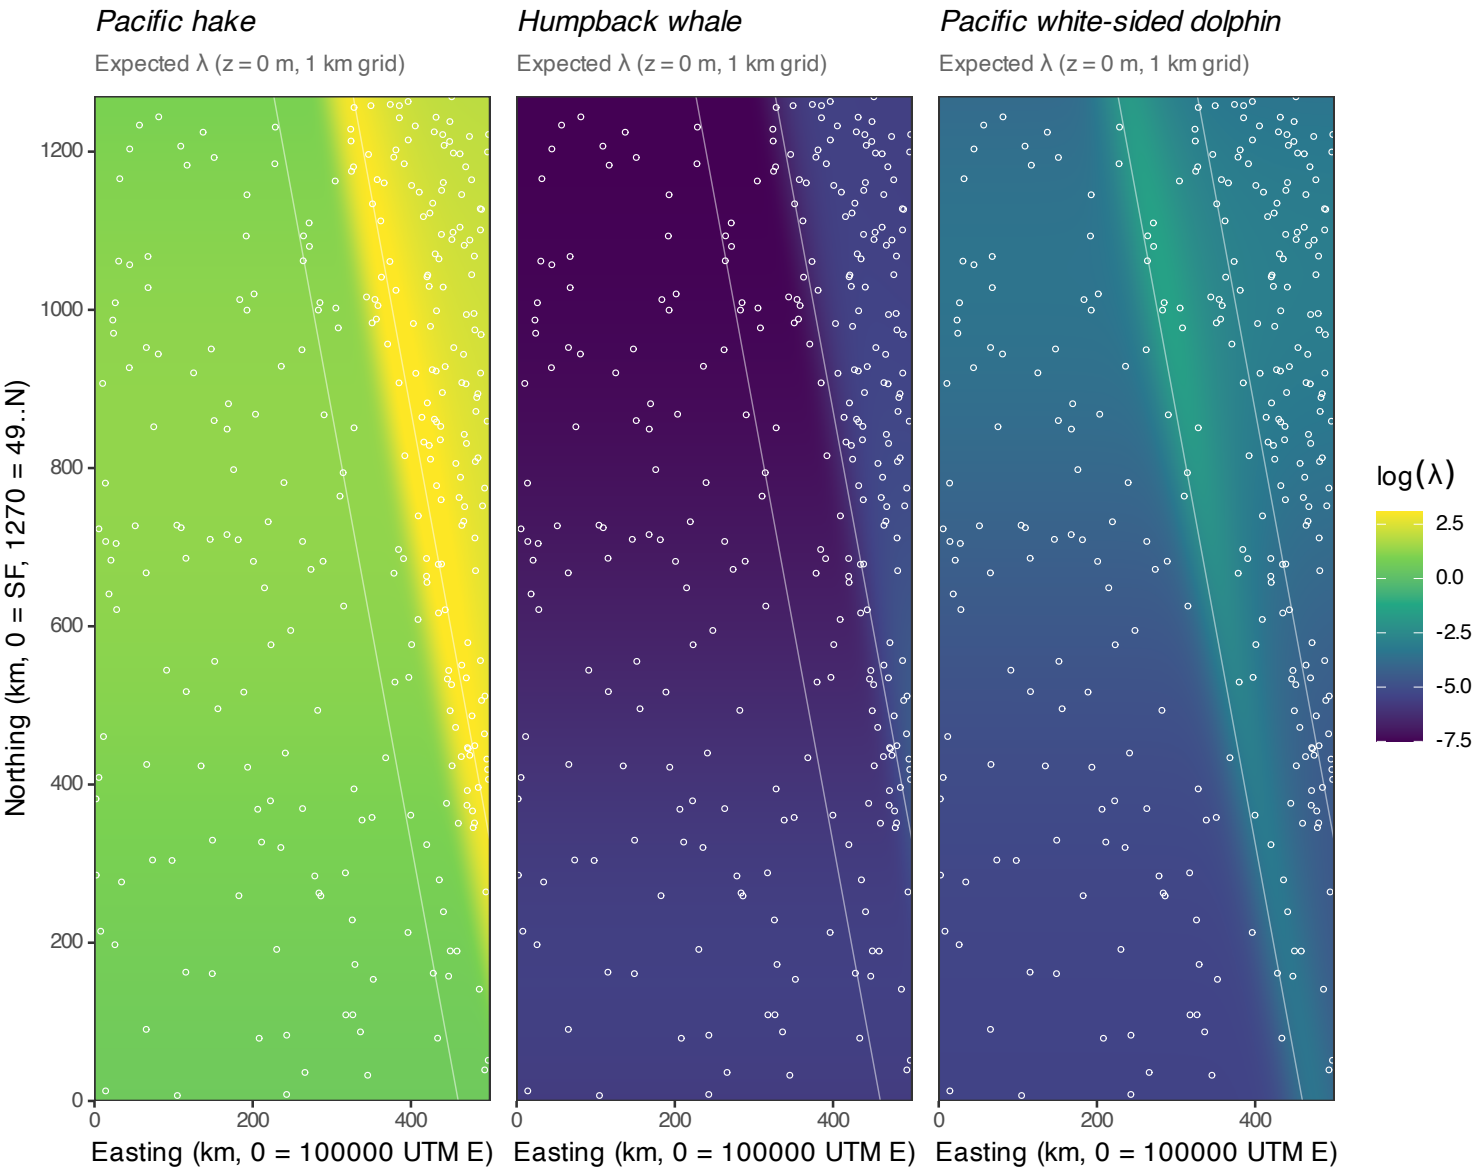
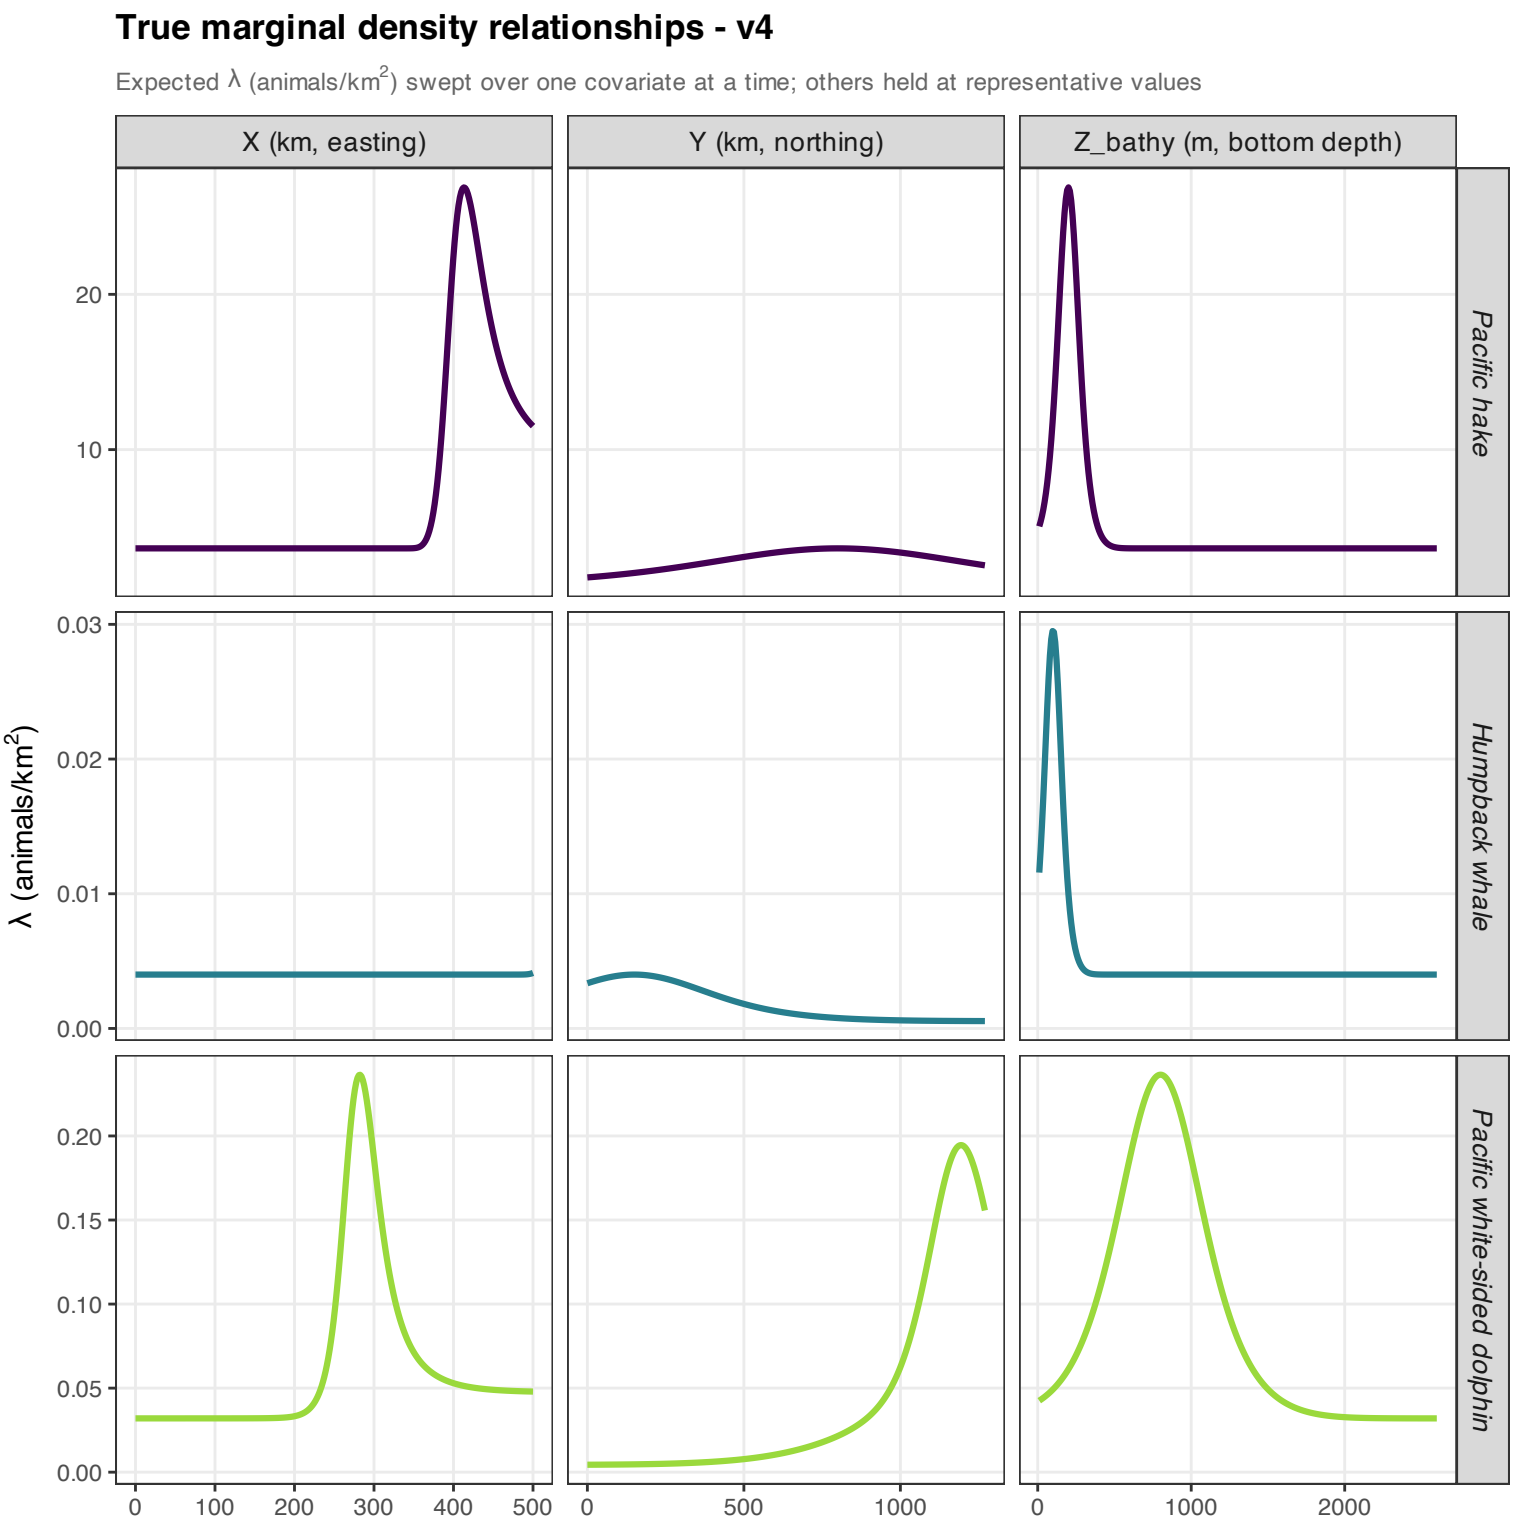
Simulated eDNA fields - SF to US/Canada border (v4)

Expected density λ on a 1 km grid at z = 0 m





True marginal density relationships - v4
Expected λ (animals/km²) swept over one covariate at a time; others held at representative values
X (km, easting)
Y (km, northing)
Z_bathy (m, bottom depth)
Pacific hake
Humpback whale
Pacific white-sided dolphin
λ (animals/km²)

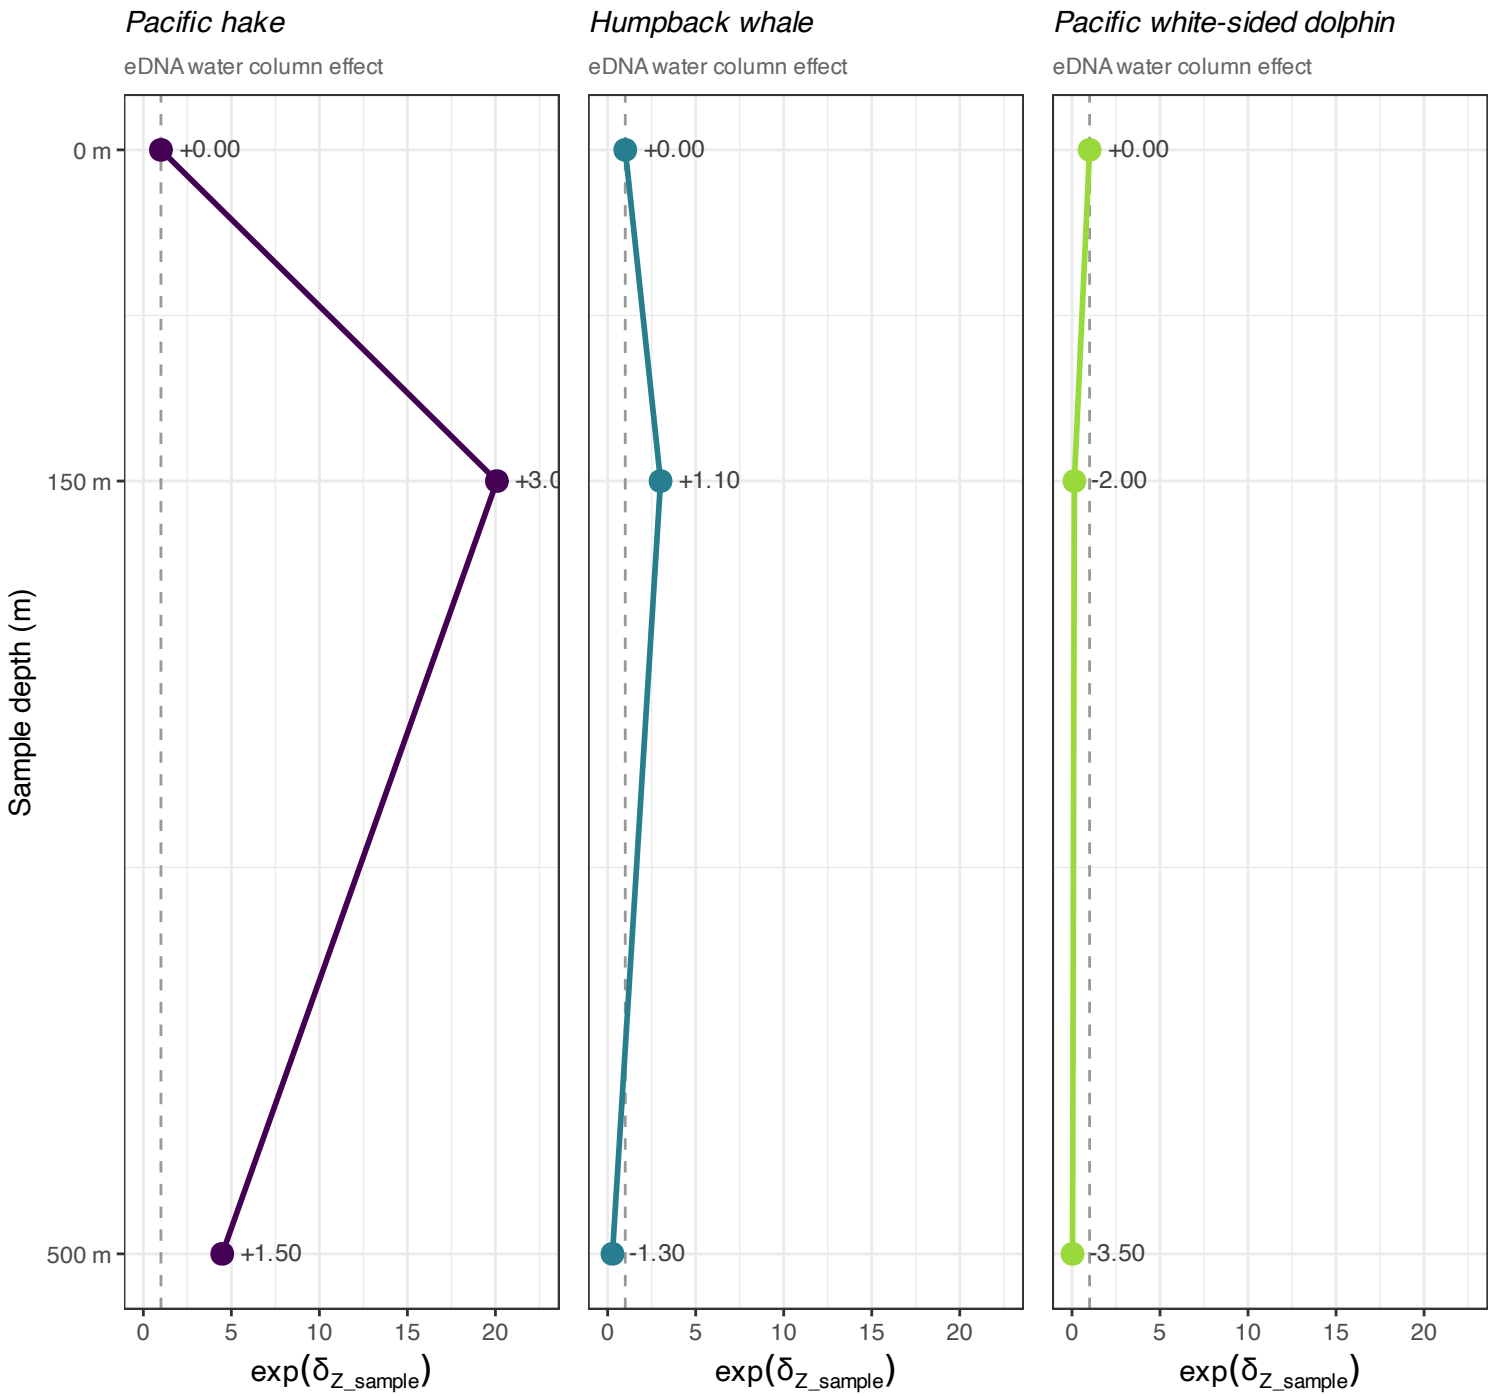
eDNA water column effect - v4


Per-species multiplicative shift on eDNA at each sample depth
